

INDEX

B		index mark for slide	42
Bandsaw—		sanding-disk table	4
fence and table extension	82	tool-post grinder	53
filed in ordinary saw vice	24	wood-turning	2
made from plywood	9	Light, clamp-on	95
3-wheel has 22-in. throat	56	Lock washers from coil springs	8
Belt sander for your lathe	59	M	
Bench stop holds work firmly	81	Mandrel—	
Bending brakes	43	from generator parts	24
Brass, bluing and blackening	80	from pedal hanger	42
Bushing driver	12	Miter box has pivoted saw guide	54
C		Motor—	
Cement—		cushioned with rubber heels	47
fastens pattern	40	variable-speed unit from jackshaft	78
for glass and metal	92	P	
Clamp, quick-acting for sawing	60	Pencil, electric vibrating	76
Cordwood saw	17	Piston forms grinder head	22
Countersink makes rivet tool	88	Plane, motorized hand	13
Cutoff saw pivots from ceiling	16	Planer, self-feeding	72
D		Pliers, cutting edge sharpened	10
Drag saw, power	25	Plywood, how to bend	88
Drill—		Press, hydraulic	31
and tap combined	81	Pulleys, removing cast-iron	8
for glass and metal	14	R	
lubricating high-speed	29	Reversing switch, safety	61
Drill press—		Rust—	
adjustable hold-down for	46	protecting tools from	22
as soldering clamp	46	removing from auger-bit flutes	78
circle cutters	57	S	
clamps for	30	Sanders—	
from car parts	15	belt	59
from pipe fittings	34	disk, with tilting table	55
hand-powered	33	double-duty	83
precision, for modelmakers	37	flexible-belt	91
speed-reducing unit	36	spindle, has flexible shaft	16
table for	36	Saw table for workshop	93
tapping attachment	23	Saws—	
E		bandsaws	24, 9, 50, 82
Emery-wheel dresser	31	cordwood	17
G		cutoff, pivots from ceiling	16
Grinder—		hacksaw, electrically driven	47
hand	87	jigsaw from sewing machine	41
head from piston	22	power drag saw	25
tool-post	53	scrollsaw	11
Guy hitch holds fast	24	swing	27
H		10-in. with tilting arbor	62
Hacksaw, electrically driven	47	Saw-sander unit	5
Hammer holds nail for starting	58	Scrollsaw, heavy-duty	11
Hold-down, adjustable wooden	46	Shaper—	
Holder—		collar from sealed bearings	21
pipe tee holds die	32	has ball-bearing spindle	89
screwdriver holds screw	49	Steel plate bent by slotting bend	46
Holes drilled in shafting	22	Stud held by ball	60
J		Switch, safety reversing	61
Jig—		T	
for boring bushings	81	Tap combined with drill	81
grinding	86	Tool slide, metal-turning	79
Jigsaw—		Tools, tempering heat checked	56
made from sewing machine	41	W	
twisted blade increases compass	60	Wheel dresser	31
L		Workshop—	
Lathe—		paper cups, uses for	78
bushing puller for	42	soap dish from tin can	58
centres from drills	16	Wrenches—	
		carried on belt	29
		socket, from socket screws	66
